GET POWER

The Supply Comes From Food.

If we get power from food, why not try to get all the power we can. That is only possible by use of skillfully selected food that exactly fits the requirements of the body.

Poor fuel makes a poor fire and a poor fire is not a good steam producer. From not knowing how to select the right food to fit my needs, I suffered grievously for a long time from stomach troubles," writes a lady from a little town in Missouri.

"It seemed as if I would never be able to find out the sort of food that was best for me. Hardly anything that I could eat would stay on my stomach. Every attempt gave me heart-burn, thinner and thinner until I literally became a living skeleton and in time was compelled to keep to my bed.

A few months ago I was persuaded to try Grape-Nuts food, and it had such good effect from the very beginning. I was kept up in the very best health, my figure rounded out, my strength came back, and I am now able to do my housework and enjoy it.

A ten days trial will show anyone some facts about food.

Look in pkgs. for the little book, "The Road to Wellville." There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.
